Is Everything Under Control?

Rayzone Group Ltd

“99% of all traffic may be completely legitimate, but the risks associated with that small element of malefactors is **huge**”

Declan Trezise

Rayzone Group Ltd

The Challenge

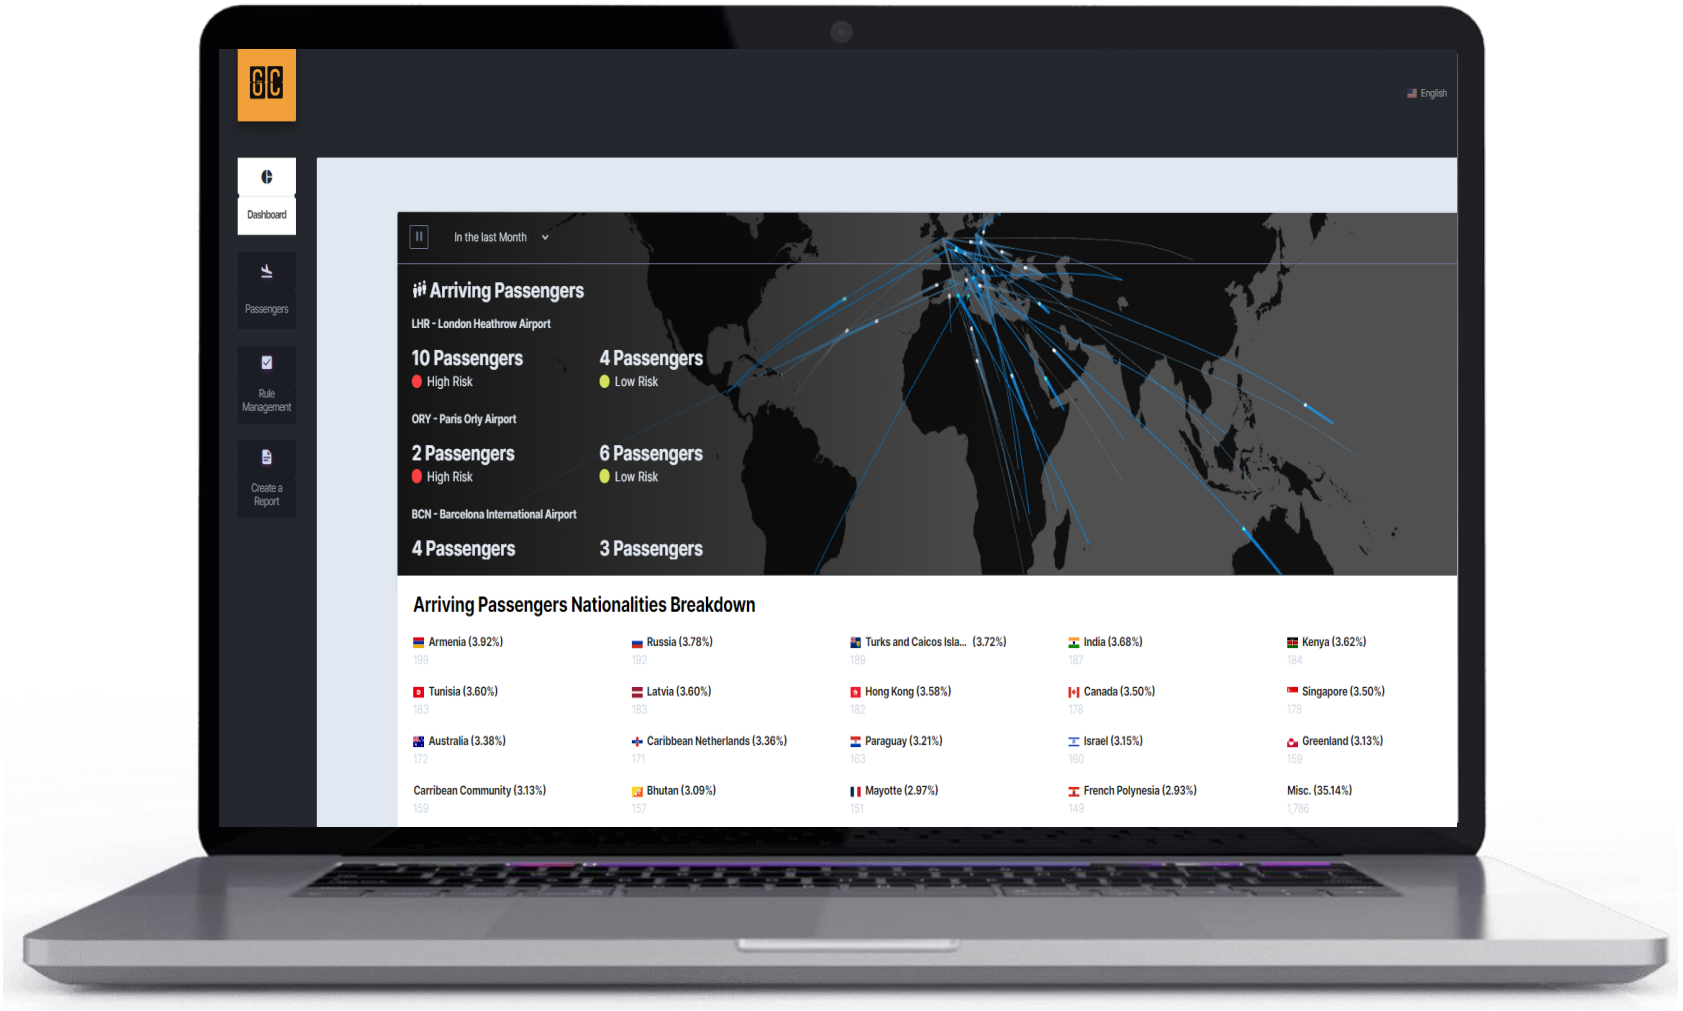
- Passengers are only met by border control officials upon reaching the airport's control point.
- There's no opportunity to **identify and monitor** individuals considered as potential threats to national security prior to their arrival to the country.
- Governments have ongoing interest in the **efficient collection and accurate analysis of passenger data**, to gain important insights and assess risks accurately.

Rayzone Group

“**BORDERINT** is the ability to automatically assess the risk of every passenger preemptively, and identify threats long before they arrive”

Rayzone Group Ltd

Our Solution



Rayzone Group
